Datron Introduces New Series of P25 Portable Radios – The Guardian II

Interoperability, superior audio quality and ease of programming helps support first responders with vital communications.

Las Vegas Convention Center, Las Vegas, NV, August 16, 2009 - Datron World Communications, Inc., a leader in HF and VHF communication products and services, today announced the introduction of the new Guardian II series of portable radios. The new Guardian II portable series offers the latest features and options needed today to ensure seamless interoperability for vital communications.

Quick and easy keypad programming, interoperability with all frequency bands, superior audio quality -utilizing the AMBE +2 vocoder- combine to provide every First Responder, Federal Agency or Public Safety user with the features and options needed for efficient and reliable P25 digital and analog communications.

“This new series of Guardian II radios offers quick and easy interoperable communications capability to those responders on the front line managing rapid response during times of crisis and natural disasters”, said John Biljan, Director of Land Mobile Radio.

The Guardian II Tri-Band portable offers a quick solution when multiple agencies operating on different frequencies are deployed. Both the Tri-Band and Single Band VHF & UHF radios include APCO P25 trunking, FIPS certified encryption and an internal GPS receiver. All radios are IP67 submersible rated.

Additional information on the Guardian II series radios as well as Datron’s full line of Guardian APCO P25 products can be found in Booth #1744 at the Annual Conference & Exposition, August 16th through the 20th at the Las Vegas Convention Center.
